

KELLY TANKS

FLOW METER PIPE REACTOR

Flow proportional inline dosing system

This clever, compact pipe reactor dosing system is designed to proportionally dose chemicals for flocculation and/or pH Control. The 2 pumps will accommodate high flow rate dosing and simultaneous chemical dosing and pH control. pH control is achieved by an intergrated pH electrode auto monitoring the pH level and initiating dosing as required. 110V/16Amp power required.

Chemical Dosing & pH Control

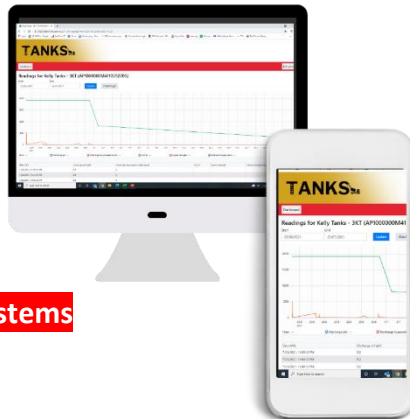

Quick Release Couplings for easy set up

High flow rates – up to 100m³

Integrated Remote Monitoring

Additional services available:

- Advisory & investigatory visits
- Site installation & commissioning
- Site visits & sample analysis
- Consultation on solutions
- Telemetry
- Maintenance & servicing
- Calibration

Perfect for use in conjunction with Kelly Tanks WTS Water Treatment Systems and Storage Tanks.

AVAILABLE FOR HIRE OR PURCHASE
